 - b. Please fill the water tank with distilled water or pure water.

1. Unfold the handle to the fixed position.
 - ① Remove the water tank, flip it over, and open the water inlet cap.
 - ② Then, add an appropriate amount of water into the water tank (with a capacity of about 120 mL).

Note: The maximum opening angle of the handle is 80°. Do not bend the handle excessively. Otherwise, the product may be damaged.

2. Close the water inlet cap, flip over the water tank, and install the water tank properly into the main body. Be sure to align the positioning mark of the water tank with the positioning mark of the main body until a "click" sound is heard, indicating that the water tank is locked into position.

Notes:

- a. When adding water to the water tank, make sure that no water overflows from the water tank. Wipe water drops off the main body if any.
- b. Be sure to close the water inlet cap securely after adding water.
- c. The water tank has a capacity of about 120 mL, with which the product can be used continuously for about 7 minutes.

Using the steam iron

1. Check that the level selector is set to "O" and insert the power plug into a suitable household outlet.
2. Turn the level selector to "SSS".
The indicator lights up in red, indicating that heating starts.

3. Wait for about 30 seconds until heating of the soleplate is completed and the indicator turns off. Now you can start dry ironing.

Note: Do not select the Steam Iron level before heating is completed. Otherwise, water leakage may occur.

4. Turn the level selector to "☁".
Now you can start steam ironing.

Steam spraying angle

About 180°

- When water leakage occurs or the steam is weak, wait about one minute instead of pressing the steam button.

Notes:

- If you turn the level selector to "☁" from "☁☁☁", the steam will be stopped in about 5 seconds. During this period, keep the product away from your body.
- After the power plug is disconnected, a small amount of steam may be ejected. This is not a sign of malfunction. (This is because there is residual water in the main body.)
